

Environment Canada Resource Sheet for Funding for Environmental Technologies

Government of Canada Climate Change Website

The Government of Canada Climate Change website has information regarding what federal departments, provincial governments, other agencies and the international community are doing on climate change.

web site: www.climatechange.gc.ca

EcoAction Community Funding Program

Environment Canada program providing financial support to community groups for projects that have measurable, positive impacts on the environment. 50% of funds are allocated to climate change projects that assist Canadians in reducing their personal greenhouse gas emissions. Non-profit groups and organizations are eligible to apply to the Funding Program.

Web site: www.ec.gc.ca/ecoaction

Environmental Technology Advancement Directorate (ETAD)

An Environment Canada Directorate providing specialized and applied S&T services to support environmental programs and regulatory functions; knowledge and assessment of technology options for EP; and S&T expertise to build capacity in Canada and internationally in EC priority areas.

Web site: www.ec.gc.ca/etad/

The Green Source

An Environment Canada EcoAction searchable database of funding sources for environmental projects by non-governmental organizations.

Web site: http://www.ec.gc.ca/ecoaction/grnsrc/index_e.cfm

Technology Early Action Measures program (TEAM)

Funded by the Federal Government's Climate Change Action Fund, TEAM brings together partners from all levels of government, industry and communities to encourage investment in innovative technology to reduce GHG emissions.

Web site: http://www.climatechange.gc.ca/english/actions/action_fund/techno.shtml

Renewable Energy Deployment Initiative – Natural Resources Canada

A Federally sponsored program to stimulate the market for solar thermal water and air heating, biomass and earth energy systems, and recently expanded to include green power generating technologies.

Web site: <http://www2.nrcan.gc.ca/es/erb/erb/english/View.asp?x=455>

Office of Energy Efficiency – Natural Resources Canada

The Office of Energy Efficiency helps Canadians find better ways to use energy and get the most from their energy dollars while protecting the environment (i.e. The Home Retrofit Grant).

Web site: <http://oee.nrcan.gc.ca>

Industrial Research Assistance Program – Natural Resources Canada

Assistance program for small and medium sized Canadian enterprises (SMEs). Provides Canadian SMEs with value added technological and business advice, financial assistance and a range of other innovation assistance.

Web site: <http://irap-pari.nrc-cnrc.gc.ca>

Technology Partnership Canada

The Technology Partnerships Canada (TPC) program provides funding loans for technology demonstrations. Environmental technologies are a key area for the TPC, which has a technology investment fund that was established to contribute to the achievement of Canada's objectives of increasing economic growth, creating jobs and wealth, and supporting sustainable development.

Web site: <http://tpc.ic.gc.ca>

Green Communities Association

Canada's national umbrella group for non-profit community-based organizations that deliver environmental programs and services.

Web site: www.gca.ca/

Green Municipal Funds

Focus on municipal infrastructure projects with a goal of improved environmental practices within Canadian municipalities. The Green Municipal Enabling Fund provides grants towards feasibility studies on projects designed to improve to quality of our air, water and soil, as well as reducing greenhouse gas emissions and using renewable energy sources.

Web site: <http://kn.fcm.ca>

Sustainable Development Technology Canada

Established to stimulate the development and demonstration of new sustainable development technologies, in particular those aimed at climate change and clean air. SDTC is an arm's length, not-for-profit corporation, created as the third-party agency that will administer this new fund.
